## Dear collectors,

Passion and pleasure are two terms that we, at LIGHTHOUSE, have associated with our accessories for more than a century. More than 7,000 products now bear the LEUCHTTURM brand name, which has become a symbol of practicality and quality. Consequently, we are extremely pleased to be able to present this edition of the catalogue for stamp accessories which contains an extensive range of items for the stamp enthusiast.

Since the beginning of the year, in addition to product images and texts, we have also been using video clips to optimise the presentation of selected products. As you leaf through this catalogue, please note the QR codes on some of the pages. If you scan them with your smartphone camera, you will be taken directly to the respective **product video**.

Every avid stamp collector is familiar with the HAWID brand. Since 1st September 2021, the popular **HAWID stamp mounts** have been part of LIGHTHOUSE's portfolio. Please turn to pages 42–43 to find an extensive range of strips, block mounts, cut-to-size mounts and other accessories.

Our new **KURT top-quality leatherette zip up ring binder case** is ideal for transporting coins, stamps, banknotes, postcards, etc. Your collection is safe from prying eyes thanks to the robust zip.

We conducted a **customer survey** a while back, and were exceptionally pleased to receive such positive feedback concerning our products, customer service and the good value for money that we offer. We intend to keep it this way. That is the reason why your feedback is particularly important to us, so that we can satisfy your needs in the future too. Please continue to support us with your comments, suggestions and even criticisms.

Everyone needs to have a passion for something! We hope you enjoy browsing our catalogue for stamp accessories.

Handwritten signatures of Kurt Stürken, Axel Stürken, and Max Stürken.

# Illustrated albums

Sophisticated philately requires a professional aptitude and attention to detail. LIGHTHOUSE illustrated country albums are not only developed with expertise and attention to detail but also manufactured with the highest quality of material and workmanship.

In addition, LIGHTHOUSE provides the stamp collector with a wide range of philatelic accessories which leaves nothing to be desired. LIGHTHOUSE illustrated country albums fulfill the demands of even experienced and discerning philatelists with a huge selection of over 140 collection areas, all compiled with the utmost in philatelic expertise by our renowned editorial department.

To store every collection in style, LIGHTHOUSE offers a variety of binders with different mechanisms and designs. These binders feature durable high quality covers with gold embossing and become long term companions for every collector.

## The advantages of LIGHTHOUSE illustrated albums

LIGHTHOUSE prints its album pages (size  $10 \frac{5}{4} \times 11 \frac{3}{4}$  " (270 x 297 mm)/13-hole system) on non-ageing wood and acid-free card (170 g/m<sup>2</sup>) in high-resolution black and white offset print. Color printing is consciously avoided. This allows you to immediately spot the missing stamps in your collection. SF mounts in sizes which match the stamps, made from clear, anti-glare polystyrene film, free from chemical softener are glued to the card of the albums. The mounts hold the stamps securely in place and prevent them from sticking. They also optimally protect your collection from dust and damage.

Many LIGHTHOUSE illustrated album pages are also available without SF preductive covers in a "regular" version.

The individual characteristics of similar stamps which vary in e.g. color, perforation or printing process are noted on the respective album sheets. This only applies to stamps with MICHEL (major) or Stanley Gibbons numbers and includes the year where required.

In this way we always ensure an aesthetically pleasing overall presentation.

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for your stamps using the appropriate SF mounts (100% polystyrene, free from chemical softeners and stabilisers).

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

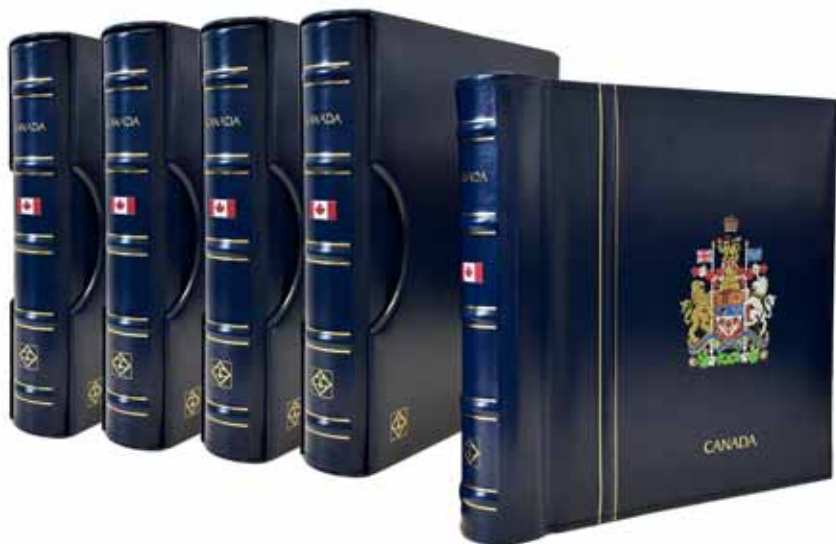

Sheets match 4 different binder types (Springback binder, 13 ring binder, turn-bar binder and bolt binder).

### OUR COLLECTORS' TIP

## Supplements:

You can always keep your LIGHTHOUSE albums up to date with the annual supplements. Supplements are published each year for stamps issued in the previous year.

## LB-sheets

LB-sheets are card sheets in album format which come with a welded predictive pocket. The film for our LB-sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents.

The practical LB-system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB-pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery.

The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

Overall size of the LB page is: 10 <sup>5</sup>/<sub>8</sub> x 11 <sup>3</sup>/<sub>4</sub>"  
(270 x 297 mm).

The HAWID range of stamp mounts

1. HAWID strips

8 1/2" (217 mm) long, in various heights. The strip is 4 mm higher than the given stamp size, to give an all around margin.  
Cut the width to your requirements.

2. HAWID block mounts

In a variety of sizes for postal stationery, blocks of stamps, miniature sheets etc.

3. HAWID cut-to-size mounts

For all common stamp sizes. Here, too, the stamp mount is 4 mm larger in size, so the stamp can be placed in the centre, as if in a frame. Clear stamp mounts are ideal for e.g. organising pre-printed (illustrated) album pages. By contrast, stamp mounts featuring a black backing film highlight the stamp's perforated edge, showcasing the actual stamp.

**HAWID stamp mounts – all the benefits at a glance:**

► Years of experience in the production of stamp mounts

► “Made in Germany” quality

► Extensive range of stamp mounts

► Holds stamps securely thanks to the strong seam

► Maximum protection against sticking and discolouration, and from dust and moisture

► Material: strips made of 100% polystyrene (free from chemical softener, acid, stabilisers)

► Anti-glare coating prevents irritating light reflections

► Specially gummed on the back of the film (simply moisten and stick)

# Stockbooks and stockcards

When we mention stockbooks, we refer to stamp albums with card pages featuring horizontal glassine or film strips, into which the stamps are inserted. Even if part of the collection is stored elsewhere, e.g. in illustrated albums, stockbooks can serve as storage space for duplicates, as a mobile solution e.g. for trading or to accommodate the most valuable pieces in a deposit box and are an essential piece of kit for philatelists.

On the following pages, you will find over 70 different varieties to match every taste and use. Please choose the size of your stockbook, the color of the card, the number of pages and the material and color of the binding.

More information about the characteristics and suitability of our sheets is available on our website at [www.lighthousecanada.ca](http://www.lighthousecanada.ca)

## Brand quality made by LIGHTHOUSE

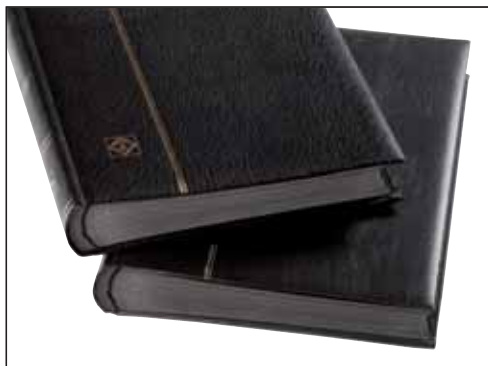

Please be aware of the subtle differences between our stockbooks when making your selection:

The **embossed gold or silver stripes** give our covers their particularly noble finish.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

Heavy duty **leather\*** with a **leatherette cover** or elegant **genuine-leather cover**. \* **LEFA** = bonded leather material consisting of leather fibres and other sustainable natural raw materials.

**Double-sided interleaves** (glassine or clear film) guarantee optimum protection for your stamps.

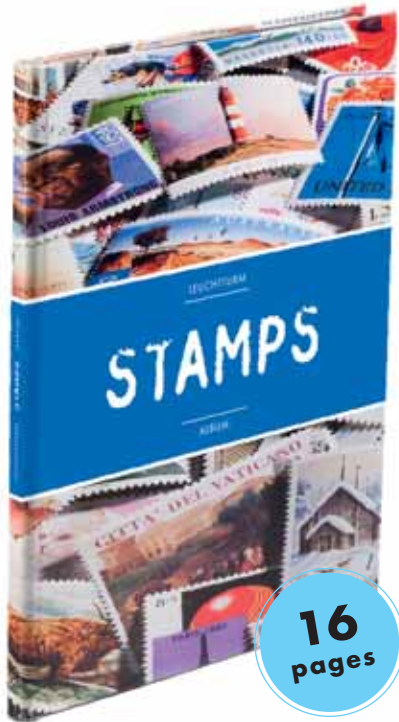

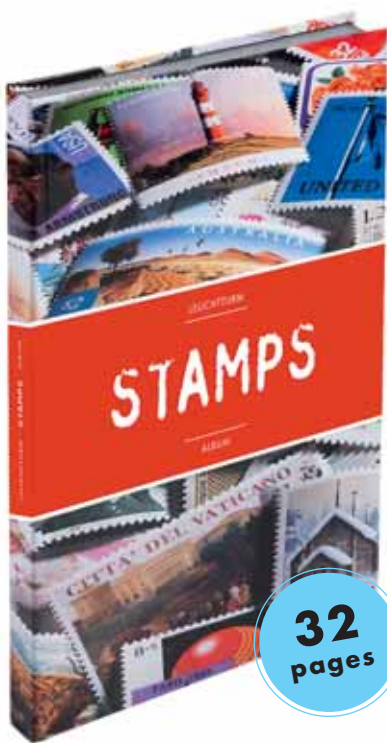

**High-grammage card**. Choose between white and black pages.

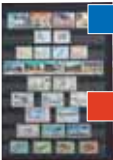

Matching **slipcases** are available separately for COMFORT, COMFORT DELUXE, PREMIUM and LEATHER formats (see following pages).

**LEFA** = **Leather fabrics** (bonded leather) is a bookbinding material consisting of leather fibres and other sustainable, natural raw materials (natural tanning agents, natural latex, natural fats and dyes).

By felling the leather fibres, the LEFA material has almost all the important characteristics of natural leather. No other material comes so close to natural leather in terms of quality and workmanship as LEFA.

The LEFA cover material we use is characterised by optimum physical characteristics (tensile strength, strong seams, durability, tear resistance, etc.).

Only high-quality and carefully selected raw materials are used for LIGHHOUSE products in order to ensure the desired product characteristics.

## INTERCEPT™-Box L180 for letters and postcards

**The box with active protection against ageing and oxidation**

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT™ material inside. Ideal for protecting paper, coins and medallions. ## Did you know?

### Magnifiers with 2–3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

### Magnifiers with 5–7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

### Magnifiers with 10–20X magnification

You are now very close the Stamp Collectors ultimate piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

### Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

### Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

### Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.
